

RAGN-SELLS

RESOURCE FOCUS vs. WASTE FOCUS

DETOXIFICATION OF PFAS

- Wastewater treatment plants, and future resource recovery plants, must be tasked to do proper detoxification of PFAS.
- Landfills play an important role in the safe storage of PFAS.
- Those who release PFAS in the system need to contribute to the cleanup (in accordance with the pollute pays principle).

LEGISLATION AND PUBLIC AFFAIRS

Ongoing processes

- The Urban Wastewater Treatment Directive (delegated acts)
- The Water Resilience Strategy

(POTENTIAL) UPCOMING LEGISLATION/INITIATIVES

- A revision of the Landfill Directive
- The REACH revision
- The Circular Economy Act
